- Customer accounts
- Checkout
- Order management
- Order history
- Inventory-related functionality
- Coupon and discount functionality
- Payment gateway integration

- Shipping integration
- Notification integration
- E-commerce administration

The exact functionality depends on the project requirements.

4. CATALOG DESIGN

Service Description

Coding Media provides professional catalog design solutions for businesses that need to present their products and services in a structured and visually appealing format.

Catalogs can be designed for digital or business communication purposes depending on project requirements.

Catalog Content

A catalog may contain:

- Product images
- Product names
- Product descriptions
- Product specifications
- Product categories
- Product highlights
- Pricing information when provided
- Brand elements
- Company information
- Contact information

Catalog structure and design are customized according to the business and its products.

5. BROCHURE DESIGN

Coding Media provides brochure design services for businesses that need professional marketing and communication material.

Brochures may communicate:

- Company information
- Products
- Services

- Features
- Benefits
- Business information
- Contact information
- Marketing messages

The brochure design is customized according to the business, audience, branding, and intended use.

6. COMPANY PROFILE DESIGN

Coding Media provides company profile design services to help businesses present their information in a professional and structured format.

A company profile may include:

- Company introduction
- Business services
- Products
- Capabilities
- Experience
- Business strengths
- Vision
- Mission
- Contact information

The structure depends on the client's business requirements and available information.

7. GRAPHIC DESIGN

Coding Media provides graphic design solutions for businesses and organizations.

Graphic design services may include:

- Logo design
- Brand identity design
- Social media graphics
- Marketing creatives
- Promotional designs
- Digital graphics
- Presentation design
- Packaging design
- Brochure design
- Catalog design

- Company profile design

Designs are developed according to the required brand identity, audience, platform, and communication objective.

8. BRANDING

Service Description

Coding Media provides branding solutions that help businesses establish a consistent and recognizable visual identity.

Branding Services

Branding may include:

- Logo design
- Logo variations
- Brand identity
- Color palette
- Typography
- Visual direction
- Brand guidelines
- Social media identity
- Marketing visual system
- Packaging identity
- Digital brand assets

Branding requirements depend on the business and project scope.

9. UI/UX DESIGN

Coding Media provides UI/UX design solutions focused on usability, visual hierarchy, user experience, and professional digital interfaces.

UI/UX services may include:

- Website interface design
- Web application interface design
- Responsive interface design
- Landing page design
- User flows
- Interface layouts

- Visual hierarchy
- Conversion-focused page structures

The design approach depends on the target audience, business objective, and functionality.

10. DIGITAL MARKETING

Coding Media provides digital marketing services designed to help businesses improve their online presence, audience engagement, visibility, and marketing communication.

Digital marketing services may include:

- Social media marketing
- SEO marketing
- Digital campaigns
- Creative content
- Audience-focused marketing
- Brand communication
- Performance-focused optimization

Marketing strategies depend on the client's business, target audience, market, and campaign objectives.

11. SEO

Coding Media provides SEO services focused on improving website search visibility and organic reach.

SEO activities may include:

- Keyword strategy
- Website optimization
- Technical optimization
- Content structure
- Search visibility improvement
- Website performance improvements

SEO activities and objectives depend on the client's website, business, market, and target audience.

12. SOCIAL MEDIA MARKETING

Coding Media provides social media marketing services to help businesses improve their digital presence and audience engagement.

Social media services may include:

- Social media strategy
- Creative content
- Social media graphics
- Audience targeting
- Campaign planning
- Engagement-focused content
- Brand communication

The exact marketing activities depend on the project scope and campaign requirements.

13. PACKAGING DESIGN

Coding Media provides packaging design solutions focused on product presentation, brand identity, visual communication, and market positioning.

Packaging design may be customized according to:

- Product type
 - Brand identity
 - Target audience
 - Packaging format
 - Required information
 - Marketing objectives
-

14. PRESENTATION DESIGN

Coding Media provides professional presentation design services.

Presentations may be created for:

- Business presentations
- Company presentations
- Product presentations
- Sales presentations
- Pitch presentations
- Marketing presentations
- Internal business communication

The objective is to present information in a clear, structured, professional, and visually engaging format.

15. AI SOLUTIONS

Coding Media provides AI-powered solutions designed to improve business communication, customer support, information access, and repetitive workflow automation.

AI solutions may include:

- AI chatbot development
- WhatsApp chatbot development
- Customer support automation
- FAQ automation
- Knowledge-based AI assistants
- RAG-based AI systems
- AI workflow automation
- Business API integrations
- AI-powered business tools

The exact solution depends on the client's business use case and technical requirements.

16. AI CHATBOT SERVICES

Coding Media provides chatbot solutions for business communication and customer support.

A chatbot may be designed to:

- Answer frequently asked questions
 - Explain company services
 - Provide product information
 - Capture customer inquiries
 - Capture leads
 - Qualify leads
 - Support customers
 - Retrieve company information
 - Connect with authorized APIs
 - Connect users with human support
 - Automate selected business workflows
-

17. WHATSAPP CHATBOT SERVICES

Coding Media can develop AI-powered WhatsApp chatbot solutions for business communication and automation.

Possible WhatsApp chatbot capabilities include:

- FAQ answering
- Service information
- Product information
- Lead capture
- Lead qualification
- Customer support
- Customer inquiry collection
- Knowledge-base responses
- Authorized API interactions
- Human handoff
- Business workflow automation

The available functionality depends on the required integrations, permissions, and project scope.

18. RAG & KNOWLEDGE-BASED AI

RAG stands for Retrieval-Augmented Generation.

Coding Media can use RAG to create AI assistants that retrieve relevant information from company knowledge before generating an answer.

Knowledge sources may include:

- Company documents
- Service documentation
- FAQs
- Product information
- Business policies
- Structured knowledge
- Internal documentation

The retrieved information is provided as context to the LLM.

The chatbot should use available company knowledge or authorized business tools for company-specific information and should not invent unsupported facts.

19. AI AUTOMATION

AI automation can connect conversational AI with business processes, APIs, databases, and authorized tools.

Possible automation use cases include:

- Lead capture
- Customer support
- FAQ automation
- Business information retrieval
- CRM integration
- Database integration
- API integration
- Workflow automation
- Customer inquiry processing
- Human handoff

Automation capabilities depend on the available systems, APIs, permissions, and project requirements.

20. MULTILINGUAL AI

AI chatbot solutions can support:

- English
- Hindi written in Latin script
- Hindi written in Devanagari
- Mixed Hindi-English conversations

The chatbot can normally match the language and writing script used by the user.

The underlying company knowledge base can be maintained primarily in English while the AI generates responses in the user's preferred language.

21. TECHNOLOGY CAPABILITIES

Depending on project requirements, Coding Media may use technologies such as:

Web Technologies

- HTML
- CSS
- JavaScript
- React
- Next.js
- TypeScript
- Tailwind CSS
- Vite

Backend Technologies

- Django
- Django REST Framework
- Node.js

Databases

- PostgreSQL
- SQLite

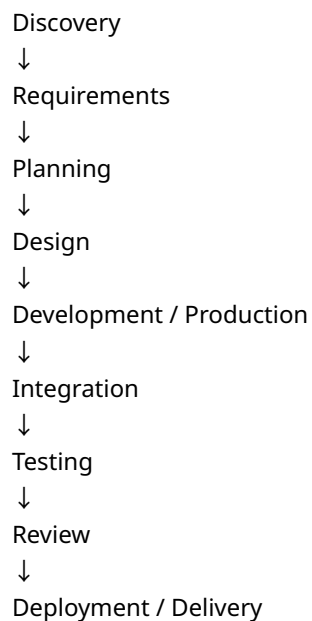

AI & Automation Technologies

- Large Language Models
- RAG
- MCP
- AI APIs
- Webhooks
- Business APIs
- Vector search
- Automation workflows

The final technology stack is selected according to the individual project requirements.

22. PROJECT DELIVERY PROCESS

A typical project may follow:

Post-Project Support

The exact process varies according to the service and project scope.

23. POST-PROJECT SUPPORT

Coding Media provides post-project support for applicable projects and services.

Support may include:

- Issue resolution
- Technical guidance
- Updates
- Maintenance
- Improvements
- Assistance with the delivered solution

The exact support scope depends on the agreed project terms.
